

Pizza Works Newsletter – MARCH / APRIL 2006

Dear Friends,

Many years ago, when my kids were in grade school, I babysat several other kids during the summer. We spent most of our time outdoors. We had 'nature stomps' at St Edward State Park. I called it that because they took the trails at a dead run down to the lake. At Juanita Beach Park we swam and built giant sand castles. We had water fights. We ate ice cream cones or popsicles almost every day. We made pizza, cookies and self picked berry pies I was always trying out something educational. I had a large garden space in my back yard. One year, I divided it into small plots for each child and let them choose what seeds they wanted to plant. I had to explain it took awhile for seeds to sprout and all summer to grow the vegetables. One young lady went on vacation with her family for several weeks. When she came back to my house later, I told her that the peas and carrots in her garden were ready to pick. It was fairly exciting for all the kids to pick their veggies and eat them fresh out of the garden as part of their lunch. Except this one young lady seemed disappointed. She wrapped her veggies in a paper towel and didn't eat them or take them home. I asked her Mom about this the next day. Her Mom said that her daughter did like peas and carrots but she didn't want her vegetables out of the garden plot because they had been grown in dirt. All her Mother's explaining didn't change her mind: she would only eat vegetables from the store.
